

## Contents

---

Low valent metal clusters — an overview B.H.S. Thimmappa . . . . .	1
Confacial bioctahedral complexes of molybdenum and tungsten H.-B. Kraatz and P. Michael Boorman . . . . .	35
Cluster forming and cage fusion in metallacarborane chemistry R.N. Grimes . . . . .	71
Clusters and water: build-up of multinuclear organometallic compounds in aqueous solution G. Süss-Fink, A. Meister and G. Meister . . . . .	97
$\eta^2$ -Alkyne copper(I) and silver(I) compounds; from polymeric $[M^I R]_n$ to monomeric $[M^I R]$ units ( $M = Cu, Ag$ ) H. Lang, K. Köhler and S. Blau . . . . .	113
An overview of higher $n$ -fold exo cage spin clusters, including (t- $\mathcal{S}$ ) $^{13}C$ -fullerenes, under $SU(m \leq n/2) \times \mathcal{S}_n$ and model $SU(m) \times \mathcal{S}_n^{1/2}$ dual spin symmetries of nuclear magnetic resonance F.P. Temme . . . . .	169
Phosphine-stabilized, platinum–gold and palladium–gold cluster compounds and applications in catalysis L.H. Pignolet, M.A. Aubart, K.L. Craighead, R.A.T. Gould, D.A. Krogstad and J.S. Wiley . . . . .	219
Associative reactions of metal carbonyl clusters: systematic kinetic studies of some ruthenium and other clusters L. Chen and A.J. Poë . . . . .	265
Transition metal boride clusters at the molecular level C.E. Housecroft . . . . .	297
Cluster-stabilized cations: syntheses, structures, molecular dynamics and reactivity M.J. McGlinchey, L. Girard and R. Ruffolo . . . . .	331
Bisalkyldiyne cluster compounds of iron D. Lentz . . . . .	383
Homogeneous catalysis by transition metal oxygen anion clusters C.L. Hill and C.M. Prosser-McCartha . . . . .	407
Pt–Re clusters and bimetallic catalysts J. Xiao and R.J. Puddephatt . . . . .	457
Hydrocarbyl ligand derivatives of group 6–group 9 heterometallic clusters M.C. Comstock and J.R. Shapley . . . . .	501

(Cyclopentadienyl) metal cluster complexes of the group 9 transition metals H. Wadepohl and S. Gebert . . . . .	535
Polyicosahedricity: icosahedron to icosahedron of icosahedra growth pathway for bimetallic (Au—Ag) and trimetallic (Au—Ag—M; M = Pt, Pd, Ni) supraclusters; synthetic strategies, site preference, and stereochemical principles B.K. Teo and H. Zhang . . . . .	611
Limitations of the polyhedral skeletal electron pair theory in organometallic cluster chemistry: examples in tri- and tetrametallic systems J.-F. Halet . . . . .	637
Author Index . . . . .	679
Subject Index . . . . .	679
